PROFESSIONAL SUMMARY

Computer Engineering student focused on embedded systems, robotics, IoT, and hardware-software integration. Experienced building Arduino and ESP32-based autonomous systems involving sensors, motor control, wireless communication, and modular software architectures.

EDUCATION

B.Sc. Computer Engineering | Obafemi Awolowo University, Ile-Ife | 2023 – 2028 (Expected)

TECHNICAL SKILLS

- **Hardware & Platforms:** Embedded Systems, Arduino, ESP32, PCB Concepts, Sensor Integration, Motor Control
- **Software & CAD:** C++, Python, FreeRTOS, Autodesk Fusion 360, Git/GitHub, HTML/CSS
- **Engineering Methodologies:** Event-Driven Architecture, Electronics Troubleshooting, IoT Systems, Robotics

PROJECTS

- **AviX Autonomous Payload (Ongoing):** Collaborating on an autonomous, edge-computing robotic sensor platform designed for extreme environmental monitoring in commercial poultry houses.
- **ModuBot Autonomous Robotic System:** Built a modular Arduino/ESP32 robot utilizing event-driven architecture for obstacle avoidance, route logging, and wireless telemetry.
- **Fingerprint Recognition Security System:** Developed an Arduino-based biometric authentication system with enrollment and secure access control functionality.
- **Bench Drill Press CAD Model:** Designed and simulated a detailed mechanical assembly using Autodesk Fusion 360.
- **Portfolio Website:** Coded and deployed a personal engineering portfolio using HTML, CSS, and GitHub Pages.

EXPERIENCE & LEARNING

- **Self-Directed Engineering:** Spearheaded project-based development in embedded systems, robotics, and IoT using C++, Python, and Fusion 360.
- **System Integration:** Proficient in troubleshooting and debugging complex hardware-software interactions.
- **Ongoing Development:** Actively expanding expertise in autonomous navigation, RTOS, and scalable IoT architectures.

TECHNICAL DEVELOPMENT

- **Applied Learning:** Mastered embedded toolchains and CAD software via intensive, independent project-driven application.
